ISBN: 978-1-922647-71-9
SKU01667
Two little green frogs lived on an island, in a lagoon. They loved the island so much. They ate, they laughed, and they played on the island.
One day, the frogs noticed something strange. Their favourite spot to play on the island was gone. It was covered with seawater. “Oh, dear!” gasped the little green frog.
“We must find a new spot to play,” said the other little frog. At night, the storm was so strong that a lot of trees fell down. “Oh, dear!” said the little frog.
“I have never seen a storm this fierce.” said the other frog. The next day, the frogs went to a nearby stream to swim but the water was too salty. “Oh, dear!” cried the little frog.
“We must find another stream.” said the other little frog. Soon all the streams in the island began to dry up because of the sun’s heat. The Island got smaller and smaller as each day passed.
The two frogs argued between themselves, all day long, about what was happening to the island. One frog said, “the Island is sinking!” while the other argued, “no, the island is shrinking!”
“Fools!” shouted a turtle as it came out of the water. “The problem is not the island.” The frogs were startled. “The sea level is rising!” yelled the turtle. “Oh no, that’s even worse!” cried the frogs.
“You must leave the island, now!” said the turtle. “Follow me!” The frogs hopped on the turtle’s shell and he led the frogs to a bigger island, nearby.
The two frogs sat on the shore. “Why is the sea level rising?” asked the frogs.
“Climate Change.” replied the turtle. “The planet’s atmosphere is getting warmer. It is causing many problems, including rising sea levels.”

“What can we do to stop it from changing?” questioned the frogs.
“It is up to the humans to save us all.”
We can help to slow down climate change.

- Plant more trees.
- Turn off lights and the television when you’re not using them.
- Walk or ride your bike instead of using the car.
- Eat more local foods to reduce plastics and packaging.
